PROFESSIONAL SUMMARY

Software Developer with 2+ years of experience in full-stack ASP.NET development, specializing in merchant management and institutional project management systems. Proficient in ASP.NET WebForms, MVC, ASP.NET Core Web API, C#, JavaScript, TypeScript, Angular, React, jQuery, SQL Server, and Entity Framework. Experienced in implementing maker-checker approval workflows, Excel-based bulk onboarding, RESTful API development, Windows Services, and third-party system integrations. Currently developing the Tula Project and Finance Management System at IIT Madras using ASP.NET MVC (.NET Framework), ASP.NET Core Web API, and Angular. Skilled in Linux server deployment (Ubuntu/Nginx), Windows IIS deployment, domain management, and Telegram bot development.

TECHNICAL SKILLS

Languages: C#, JavaScript (ES6+), TypeScript, T-SQL

Backend: ASP.NET WebForms, ASP.NET MVC, ASP.NET Core Web API, Entity Framework

Frontend: HTML5, CSS3, JavaScript, jQuery, AJAX, Bootstrap, Angular, React

Database: MS SQL Server, T-SQL, Stored Procedures, Query Optimization

DevOps & Infra: Linux Ubuntu, Nginx, IIS, Domain Management, SSL/HTTPS, Server Deployment

Tools & Services: Visual Studio, Git, Postman, SSMS, Windows Services, RESTful APIs, Telegram Bot API

PROFESSIONAL EXPERIENCE

Software Developer | T&M Services Consulting Pvt Ltd (Client: IC & SR, IIT Madras) April 2026 – Present

- Developing and maintaining Tula, a Project and Finance Management System built on ASP.NET MVC (.NET Framework) with Entity Framework 6 for backend and ASP.NET Core Web API with Angular for modern frontend modules, used internally by Professors and staff at IIT Madras.
- System serves multiple departments including HR, Accounts, Legal, and IPM (Intellectual Property Management), centralizing project tracking and financial workflows.
- Working across two layers — legacy ASP.NET MVC (.NET Framework) with EF6 for existing modules, and ASP.NET Core Web API with Angular for newer features — ensuring seamless integration between both stacks.

Software Developer | Cogent Innovations Pvt Ltd, Chennai

December 2023 – March 2026

- Developed and maintained Merchant Management System (MMS) used by SBI and AXIS Bank to manage merchant acquisition and onboarding processes.
- Built web applications using ASP.NET WebForms, MVC, C#, JavaScript, jQuery, and SQL Server for merchant sales and management operations; developed Angular components for dynamic UI features and contributed to React-based modules in select projects.
- Implemented Maker-Checker approval workflow for merchant data modifications — changes to name, mobile, or account number applied only after checker authorization, ensuring compliance and audit trails.
- Built RESTful Web APIs for seamless data exchange with third-party systems including EPH (Electronic Payment Hub) and TMS (Terminal Management System).
- Created Windows Service applications for automated background processes including data synchronization with external systems and scheduled notifications.
- Developed Excel-based bulk merchant onboarding feature allowing banks to upload merchant data for mass registration, including file parsing, validation, and automated error report generation.
- Wrote stored procedures and optimized SQL queries for merchant data operations; implemented indexing to improve performance for 500+ concurrent users.
- Integrated third-party APIs for system interoperability with external merchant processing platforms.

Key Contributions

- Streamlined merchant onboarding via Excel bulk upload, reducing manual data entry effort by 70%.
- Established reliable API integration with EPH and TMS systems for automated merchant data synchronization.
- Created Windows Services for background job processing, improving system reliability and reducing manual intervention.

Internship (5 months)

- Assisted in full-stack web development tasks using ASP.NET and related technologies.
- Gained hands-on experience in building and integrating web application features during a structured internship program.

DEPLOYMENT & INFRASTRUCTURE

- Deployed .NET Core web applications on Linux Ubuntu servers using Nginx as a reverse proxy; configured systemd services for process management.
- Deployed and hosted ASP.NET applications on Windows Server using IIS; managed application pools, bindings, and environment configuration.
- Managed domain registration, DNS configuration, and mapping custom domains to both Linux and Windows servers with SSL/HTTPS setup.
- Developed Telegram bots using the Telegram Bot API integrated with .NET backend services for automated notifications and interactions.
- Created and configured Windows Services for long-running background jobs and scheduled task automation.

PERSONAL PROJECTS

MyHRMailer — ASP.NET Core 8 MVC Job Application Emailer

<https://myhrmailer.runasp.net>

- Built a full-stack ASP.NET Core 8 MVC application for sending professional job application emails to HR managers via Gmail SMTP, with secure login via Local and Google OAuth accounts.
- Implemented Entity Framework Core 8 with SQL Server for user management, email settings, send history, and CSV export of email logs.
- Featured 4 editable email templates, drag-and-drop resume upload, live HTML preview, bulk sending, stats dashboard, dark/light mode, and mobile-first responsive design.
- Tech Stack: ASP.NET Core 8 MVC, C# 12, Entity Framework Core 8, SQL Server, MailKit/MimeKit, ASP.NET Core Identity, Bootstrap 5, jQuery.

EDUCATION

Bachelor of Commerce – Accounting and Finance

2020 – 2023

Madras University, Tamil Nadu
